

Mobile Welding Fume Collector

Product Description

The mobile welding fume extractor is suitable for all types of welding work stations. The unit generates a high airflow for the effortless extraction of even large clouds of welding smoke. The dirty air will be filtered with 99.9% efficiency and the clean air will be re-circulated into the workplace.

The attached 10' extraction arm is very flexible and adaptable for reaching larger work pieces.

The tilt-back mechanism of the filter housing simplifies dust collection and disposal in a bag.

Cleanable long life cartridge filters help to keep operating costs down.

Technical Data:

Max. airflow	550 cfm
Filter surface area	108 sq ft
Inlet diameter	6"
Length of arm	10'
Motor	2 hp
Voltage	110 V/60Hz – 1 phase
Dimensions LxWxH	37" x 30" x 54"
Weight	152 lbs
